LinkMate Wireless Switch Router

Make Any Switched Output Wireless!

OKC's new LinkMate x4 switch router provides a low cost solution for wireless switch routing. Sold in Tx/D/Rx/D pairs, the units are self contained with integral solar chargers. LED status indicators are easily viewed through clear smokey covers, and an easily accessible, removable terminal block provides simple sensor hook up. The LinkMate WSR is the right choice for:

- Plunger Arrival Sensor
- Shut-Down Control
- Chemical Injection
- Tank Level Alarm
- Compressor Control
- Latching Relay Control

A simple user interface, low power operation and rugged packaging provide a high level of field reliability. The LinkMate WSR is intrinsically safe for use in C1D1 hazardous locations.

Smart technology...at a very affordable price — about half the cost of most other brands on the market!
